

Worldwide Energy, Inc. Announces launch of new Website.

Worldwide Energy, Inc. is delighted to announce the launch of its redesigned website including a short video. The new customer-focused site embodies Worldwide Energy, Inc.'s forward-thinking vision and commitment to the growing needs of its consumers. Worldwide Energy, Inc. offers turnkey solutions to a broad range of commercial, municipal and government entities throughout the US, to improve energy efficiency and reduce utility expenditures.

Lenexa, KS ([PRWEB](#)) May 3, 2011 – Worldwide Energy, Inc.'s new user-friendly website welcomes visitors with a clean uncluttered design, moving images, blogging and pull down menus. Featured content is centered on Worldwide Energy, Inc.'s mission to help the commercial industry increase energy efficiency, by reducing energy consumption and carbon emissions.

Visitors to the site will find a comprehensive overview of state-of-the-art energy efficient products with benefits and features listed. Content will include: interior & exterior lighting, heating & cooling, motor power factor enhancement, window tinting, cool roofs and solar solutions. Visitors are invited to sign up for our monthly "EnergyRich News" newsletter and stay on the cutting edge of energy efficient updates.

Worldwide Energy, Inc. has experienced phenomenal growth and has rapidly gained attention with businesses nationwide. "With constant industry updates, the introduction of new technology and services; it was time for a comprehensive restructuring of our online presence and it will provide increased flexibility for future growth," said Worldwide Energy, Inc.'s Vice President & COO, Gaylen Davenport.

What sets Worldwide Energy, Inc. apart from competitors is its ability to provide a complete turnkey implementation of all types of energy efficiency upgrades and, as the single point of responsibility, insure clients' complete satisfaction. This includes the ability to design and certify efficiency projects to meet the EPA's requirements and provide the comprehensive tax package to secure the client's tax deduction along with procuring all available utility incentives.

Worldwide Energy, Inc. (www.worldwideenergy.com) services include facility energy audits and analysis, turnkey retrofit implementation, sales of energy efficient products, and handling of all the rebate/tax incentive paperwork for its clients. The web developer, Bo Lais of Brazen Web Design (www.brazenwebdesign.com) was responsible for the redesign and worked closely with Worldwide Energy, Inc.'s Marketing Department to enhance the site's usability, content, and navigation.
